Company Profile

Founded in 1982, Leading Tools Industrial Co., Ltd. has specialized in the development and production of high-quality artisan tools, including finishing trowels, notched trowels, pointing and gauging trowels, masonry tools, brick and pointing tools, concrete tools, building tools, and flooring trowel.

The company employs some 35 skilled workers at a factory in central Taiwan. The factory is installed with state-of-the-art machines to turn out over 10,000 pieces of high-end trowels per day. Most of the company`s products are exported to Europe, Australia, New Zealand and North America.

With streamlined facilities and efficient operation, Leading Tools is certified to the ISO 9001 quality management standard. Besides manufacturing products in massive volume, the company also fabricates tailor-made products to meet special orders.

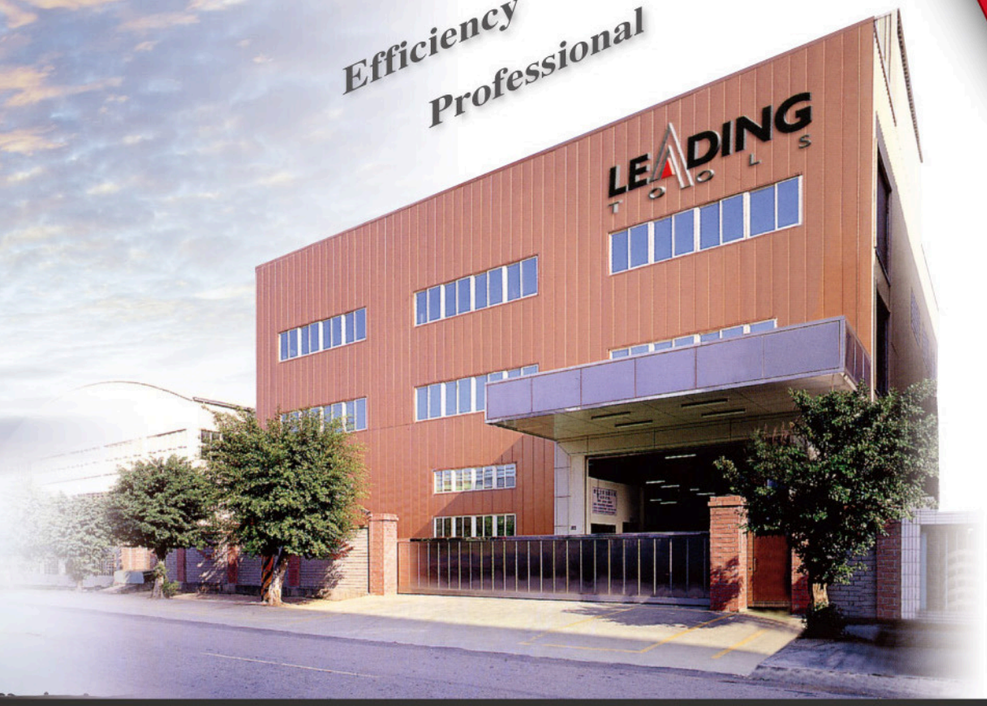

To maintain its strength in the world market, Leading Tools has kept rolling out sophisticated items, which have been quite popular with buyers. The company uses elastic steel to make these products and a spate of relevant construction tools are under development. It welcomes any requests from customers.
